

THE COLLECTION

by  **PLANTPUSHER**

INTRODUCTION

The O Collection is an exclusive range of contemporary planters and outdoor furniture manufactured from a wide variety of materials including steel, copper, stainless steel, aluminum, fiberglass and acrylic.

The unique products are handmade with a focus on creating products that the consumer can identify with on an aesthetic level using simple elegant shapes and minimalistic elements. Included in this product range is a line of beaded botanicals made by artisans whose lives have been affected in some way by HIV/AIDS. The monies earned are their main source of income and allow them to care for their family members and purchase medicine.

The O Collection is available in various styles and ranges which can be finished in a number of ways. These planters and outdoor products will enhance any environment. In addition to the standard shapes and finishes available, we will produce custom made products to suit any project or application.

PRODUCT INFORMATION & CARE

STAINLESS STEEL The standard stainless steel planters are made of 304 or 430 grade stainless steel - but 316 marine grade stainless steel can be supplied on request which is recommended if the planters are to be used near the sea.

The 304 grade stainless steel is recommended for interior or exterior use. The 430 grade stainless steel is specifically produced for interior use in areas where rust is not prevalent.

It is important to keep the stainless steel clean and free from any corrosive residue to avoid rust problems.

STEEL The standard steel planters are made of 2mm thick mild steel. These can be powder coated or supplied in an actual rust finish. The powder coating will protect the steel from corrosion to an extent but this is not guaranteed as different environments will have varied effects on the material over the long term. We do not recommend the use of steel products close to the sea or in areas prevalent to rust.

The actual rust finish will continue to rust - the rust will be accelerated the closer they are to the coast or a high rust area.

COPPER The copper planters require a great deal of maintenance to keep them highly polished. They can be used inside or outside, but if used outdoors they will need an immense amount of polishing to keep the original factory shine.

FIBERGLASS Fiberglass planters are versatile and can be used for interior or exterior applications. The product is very light in weight so it is advised that it is weighed down if used outside so that it does not fall over and get damaged should it be placed in a windy area.

ACRYLIC PLANTERS The acrylic plant pots are made of fragile material and the stainless steel components are 430 grade stainless steel. This is strictly an interior product. The acrylic is prone to scratching if mishandled and it is important to keep the stainless steel clean and free from corrosive residue to avoid any rust problems.

Please Note:

Some of our products and finishes are recommended specifically for interior use only, in particular any item that is made of or has components of 430 grade stainless steel - this includes the acrylic plant pots and the 430 grade stainless steel planters if this material option is ordered.

It is important to regularly clean stainless steel to keep the surface free from any corrosive residue to avoid rust problems - in an indoor or outdoor environment. It is salt and acids in the air that will cause rust on metals - not water.

The standard stucco finish on fiberglass plant pots is an interior finish but outdoor options are available.

Planting

Planting boxes are welded into the top opening of each planter - except for the fiberglass or copper planters which have drop in / removable planting boxes. It is recommended that the inside of the planting box is lined with a plastic liner to protect the metal from any fertilisers or chemicals that may be included in the planting mix used. It is suggested that plants with a small root base that needs a minimum supply of water should be used (cacti are ideal). Plantpusher, Inc. will not be held responsible for material damage caused by corrosion stemming from soil and chemical residue from the planting area.

Transport & Delivery

Our products are delivered only, delivery prices do not include installation (unless otherwise instructed and quoted for).

The products are delivered by courier and although we take the greatest care to ensure that your goods arrive at their destination in good order, there may be the odd occasion that a parcel is damaged in transit. Please ensure that when the parcel/s is delivered that the packaging is checked and if it looks like any parcel has been mishandled, please unwrap and check the goods for damage before signing the proof of delivery. If the product is damaged make a note of the details on the delivery note and call us immediately so that we can rectify the situation ASAP.

If the damage is not reported when the delivery takes place the courier company is within their rights to deny any responsibility and not accept any claim on the insurance for the damage.

This information is supplied to assist you with making an informed decision about which items will suit your needs.

STEEL

All steel pots are available in rust finish, custom painted or texture finish. A more durable (3CR12 utility grade) steel is also available.

The A Series - Each pot has a planting box welded under top opening with drainage holes or a drop in planting box can be specified. The top opening and depth of the planting box can be made custom.

The B Series - Made with an 8mm thick steel curved top and a planting box welded under the top opening.

The C Series - This pot is ideal for commercial projects and high traffic areas as the wide bottom ensures that it is very stable and will not be knocked over accidentally.

The D & E Series - Both series can be made in steel upon request.

The Round Pots - Each pot has a planting box attached to the top collar of the pot which is removable, making cleaning and replanting easier. The collar is available in steel or stainless steel in a wide or narrow rim.

The TILT - This pot offers a variety of effects when different placement combinations are explored and adds an element of quirky design to any environment.

FIN pots & vases - are comprised of layered steel rings on a central core.

STAINLESS STEEL

Stainless Steel is available for the **A Series, C Series, D Series, E Series, Round** and **Tilt**. These plant pots are supplied in a 304 grade stainless steel in a satin or mirror finish and are suitable for indoor or outdoor use. An alternate 430 grade is supplied in a mirror finish and is suitable for indoor use only.

The stainless steel round pot can be supplied with an illumination unit if required but is for interior use only.

COPPER

Each pot has a drop in planting box made of aluminum. These plant pots are supplied in a polished, mirror finish and are suitable for indoor use. They do require regular polishing to maintain the finish. Available in **A Series** 23^{1/4}" and 39^{3/8}" only.

ACRYLIC

ACRYLIC

The acrylic **A Series** comes with a stainless steel center column which supports the plant and allows for water drainage.

Acrylic is a fragile material and is recommended for indoor use only. Colors come in both clear and frosted versions but are subject to availability at time of order and a minimum quantity may apply to specific colors.

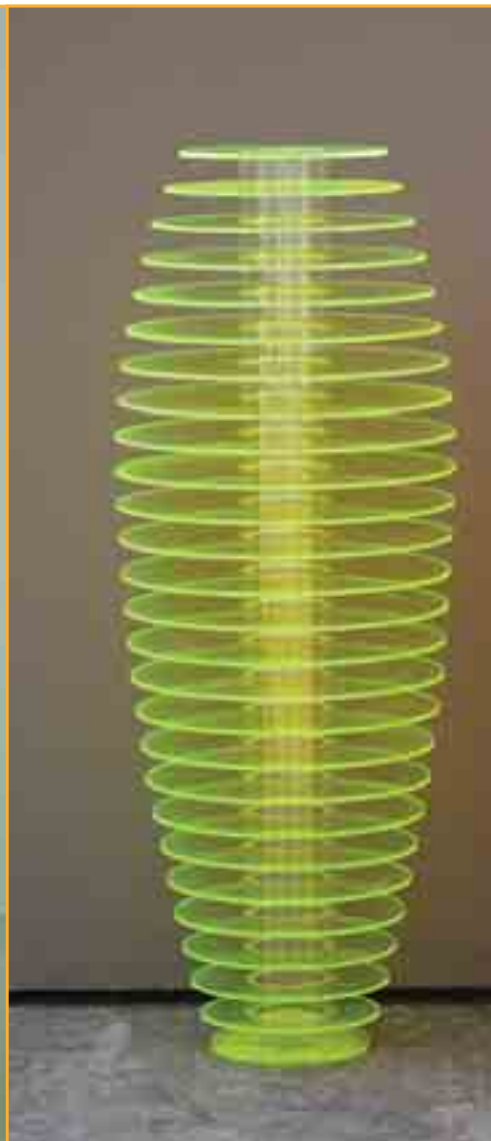

Some **FIN** series are available in acrylic as well.

by **PLANTPUSHER**

FIBERGLASS

Fiberglass is a light, durable material that can be finished in a number of ways. The pots are available in the **A Series**, **D Series**, **E Series**, the **Round Series** and the **Bubble Pots**.

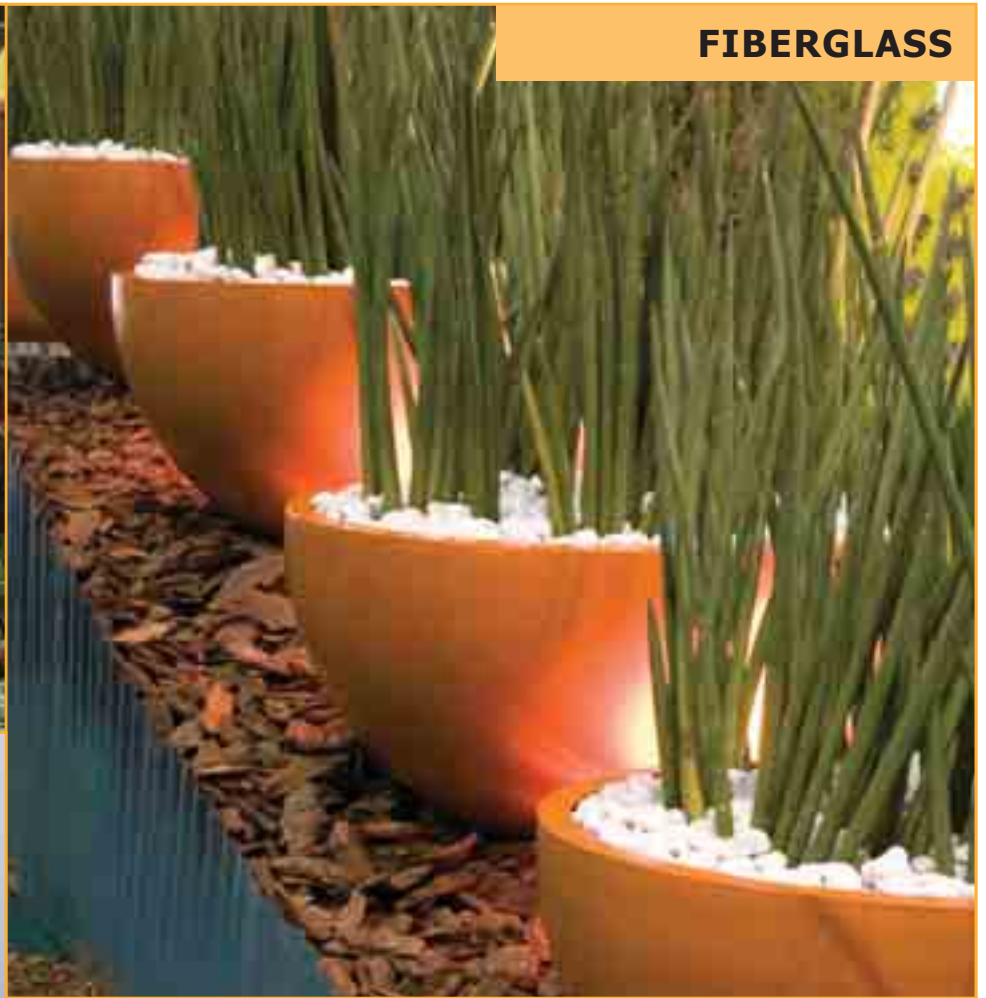

The **Round Series** unique to fiberglass is available in 26", 43⁵/₁₆", 47¹/₄" (tapered and wide) and 59¹/₁₆". The 59¹/₁₆" and 47¹/₄" plant pots have drop in planting boxes. The 47¹/₄" (Wide) & 26" pots allow for the full internal volume to be used for planting, which makes them ideal for plants and trees with large root bases.

The **Bubble Pot** is supplied in 35¹/₂" & 23⁵/₈" diameters and is specifically for hedging plants to create a ball shape when the hedge is grown and trimmed to the shape of the metal frame.

These plant pots can be finished in a wide variety of materials and techniques to suit the environment they will be used in.

FINISHES

THE  COLLECTION 
by **PLANTPUSHER**

FINISHES

We have a wide variety of finishes available to us depending on the type of material you choose for your planters.

Steel - Steel planters can be finished the following ways: paint, powder coated, mosaic, rust or painted rust.

Stainless Steel - These planters come in two grades. The 304 (outdoor) grade allows for mirror, satin and distressed finishes. The 430 (indoor) grade only comes in the mirror finish.

Copper - Copper planters are available in both aged and mirror finishes.

Acrylic - Our acrylics come in both clear and frosted colors.

Fiberglass - Fiberglass allows for a large selection of finishes including texture, stucco, paint, mosaic, print (**A Series** only) and painted rust.

FINISHES

All paint and powder coated colors can be customized to suit your needs. We have a variety of prints available for your use should you select a print finish but can also use any image you provide. For mosaic planters we are able to suggest designs suitable for your project, or work with designs chosen by you.

ACCESSORIES

BEADED ALOES/PLANTS

These unique bead aloes are part of an exclusive range of beaded accessories made for PlantPusher by various local crafters and organizations including Woza Moya at the Hillcrest Aids Centre Trust, in Durban.

This income generating project has been developed to help support marginalized sectors of the local community and empower disadvantaged individuals.

Woza Moya is a self-help project initiated by the Hillcrest AIDS Centre, as part of a holistic care program. Clients, who are either affected/infected by HIV, are referred to either the feeding scheme or the income generation project by the nurses. The project aims to uplift people affected/infected by HIV/AIDS. It helps men and women regain hope and dignity by getting them to use their creativity to earn an income. At present Woza Moya acts as an agent for over 170 crafters. Woza Moya is a dynamic and creative organization whose primary focus is beadwork.

BEADED ALOES/PLANTS

ACRYLIC ALOES

Acrylic plants are available in several colors including - clear white, pale yellow, red, orange, bright green and sky blue. They make a great accessory to contemporary environments and are a maintenance free alternative to plants in areas where light is not sufficient for live plants. They are specifically for interior use.

BENCHES

Wave bench: Available in powder coated aluminum or stainless steel. Ideal for outdoors, used as furniture or garden decoration. Powder coated bench can be supplied in a variety of colors.

Slat bench: Manufactured using either Balau or Sapele Mahogany timber, or in cast clear acrylic with stainless steel components.

Flat slat bench: Timber slats with a Stainless steel frame.

Steel bench: Simple design that allows it to fit into any environment.

Organic bench: Modern style steel bench with a organic touch of style.
